COVID-19 WATCH

Tuesday, June 2, 2020
Data through week ending 5/30/2020

Summary of Confirmed COVID-19 Cases, San Diego County Residents

**Cases**
- 7,481
- Median Age: 45
- Range: 0-102

**Deaths**
- 269
- Median Age: 78
- Range: 23-101

**Outbreaks**
- 86
- Percentage in Congregate Settings: 70%

**COVID-19 Cases by Onset* Week**

Emergency Department Data

**Figure 10.** Percent of Emergency Department Visit Chief Complaints for ILI, Respiratory Symptoms, Fever, or COVID-like Illness* by Week, San Diego County

![Graph showing trends in emergency department visits for ILI, respiratory symptoms, fever, and COVID-like illness by week.]

Categories are not mutually exclusive. *COVID-like Illness includes fever and cough, shortness of breath, or difficulty breathing OR coronavirus diagnostic codes.

**Figure 11.** Percent of Emergency Department Visit Chief Complaints for ILI, Respiratory Symptoms, Fever, or COVID-like Illness* by Week, San Diego County Among Patients Age 60 Years or Older

![Graph showing trends in emergency department visits for ILI, respiratory symptoms, fever, and COVID-like illness among patients age 60 or older.]

Categories are not mutually exclusive. *COVID-like Illness includes fever and cough, shortness of breath, or difficulty breathing OR coronavirus diagnostic codes.
COVID-19 Laboratory Test Positivity Rate

Figure 12. COVID-19 Testing Volume and Positivity by Week of Specimen Collection, San Diego County

Includes PCR tests performed by COSD Public Health, hospital, and reference laboratories and reported via Electronic Laboratory Reporting (ELR). Excludes invalid, indeterminate, and unsatisfactory results.

COVID-19 Watch Data Sources

The following sources of data are used to produce this report:

- **COVID-19 case reports**: Medical providers and laboratories report individual cases of PCR-confirmed COVID-19 via fax or electronic laboratory reporting (ELR) to the County of San Diego Epidemiology Unit.

- **COVID-19 deaths**: The County of San Diego requests that all deaths related to COVID-19 be reported for surveillance purposes. Medical facilities may report these deaths directly to the Epidemiology Unit or they may be identified by the Office of Vital Records through death certificate registration. The Epidemiology Unit compiles the data, and only reports deaths that can be verified by a death certificate or medical record.

- **Emergency Department Chief Complaint Data**: Electronic emergency department data are reported to the Epidemiology Unit daily. The number of respiratory chief complaints and the number of total emergency department visits are used to calculate percentages for all respiratory-related visits and visits specific to influenza-like illness, cough, cold, fever, and COVID.

- **COVID-19 outbreaks**:
  - Institution/congregate settings: Two or more cases (residents and/or employees), with COVID-19 acute respiratory illness with symptom onset within 14-days of each other, at least one case is laboratory-confirmed for COVID-19.
  - Community settings: Three or more laboratory-confirmed COVID-19 cases in different households in a cluster of COVID-19 associated acute respiratory illness. Must have public health importance.

- **SANDAG population estimates, vintage 2018**: Rates are calculated using 2018 population estimates from the San Diego Association of Governments. Rates are not calculated for counts under five cases.

The purpose of the weekly COVID-19 Watch is to summarize current COVID-19 surveillance in San Diego County. Data are preliminary and may change due to delayed reporting and additional information obtained during investigations.
