LIVE WELL
SAN DIEGO
Tuesday, July 14, 2020
Data through week ending 7/11/2020
COVID-19 Laboratory Test Positivity Rate

Includes PCR tests performed by COSD Public Health, hospital, and reference laboratories and reported via Electronic Laboratory Reporting (ELR). Excludes invalid, indeterminate, and unsatisfactory results.

## COVID-19 Watch Data Sources

The following sources of data are used to produce this report:

- COVID-19 case reports: Medical providers and laboratories report individual cases of PCR-confirmed COVID-19 via fax or electronic laboratory reporting (ELR) to the County of San Diego Epidemiology Unit.
- COVID-19 deaths: The County of San Diego requests that all deaths related to COVID-19 be reported for surveillance purposes. Medical facilities may report these deaths directly to the Epidemiology Unit or they may be identified by the Office of Vital Records through death certificate registration. The Epidemiology Unit compiles the data, and only reports deaths that can be verified by a death certificate.
- Emergency Department Chief Complaint Data: Electronic emergency department data are reported to the Epidemiology Unit daily. The number of respiratory chief complaints and the number of total emergency department visits are used to calculate percentages for all respiratory-related visits and visits specific to influenza-like illness, fever, and COVID.
- COVID-19 outbreaks:
- Skilled Nursing Facilities: at least one case of laboratory-confirmed COVID-19 in a resident.
- Non-SNF Institution/Congregate Settings: at least one case of laboratory-confirmed COVID-19 in the setting of $\geq 2$ cases of acute illness compatible with COVID-19 in residents or staff members of residential congregate settings with onset within a 14-day period.
- Community settings: three or more laboratory-confirmed COVID-19 cases in different households in a cluster of 2 or more acute illnesses compatible with COVID-19** with onset within a 14-day period.
- SANDAG population estimates, vintage 2019: Rates are calculated using 2019 population estimates from the San Diego Association of Governments. Rates are not calculated for counts under five cases.

The purpose of the weekly COVID-19 Watch is to summarize current COVID-19 surveillance in San Diego County. Data are preliminary and may change due to delayed reporting and additional information obtained during investigations.
