BACK TO SCHOOL?

Gov. Gavin Newsom, whose initial public school reopening proposal met resistance, said on Tuesday that he is close to finalizing a deal with California lawmakers and governors to make an announcement this week. Below, five health experts weigh in on what should be considered before a return to in-person education after nearly a year with distance learning.

STUDENTS SHOULD BE ON CAMPUS, TIME FOR ONLINE LEARNING TO END.

BY JENNIFER SHUEY

Los Al, the South County Union School District, made the decision to cancel hybrid learning on March 31, citing the need to focus on virtual learning, student safety, and the mental well-being of teachers and students.

As the academic year was wrapping up, Los Al leaders were preparing for a potential return to full-time, in-person instruction. The district had already implemented a hybrid model, with some students attending school in-person and others attending online.

However, the decision to cancel hybrid learning was based on the need to prioritize the mental well-being of teachers and students. The district has been dealing with a significant number of teacher resignations, and the mental health of students has been impacted by the pandemic.

The decision to cancel hybrid learning was made with the well-being of the entire district in mind. The district's leaders are committed to providing a safe and healthy learning environment for all students and staff.

BE CAUTIOUS WITH SCHOOL REOPENINGS.

BY LISA LERNER

While San Diego County continues to be one of the counties with the lowest percentage of COVID-19 cases, the county is still facing a significant challenge as it navigates the return to in-person learning.

The county has been working closely with state officials to develop a plan for the safe reopening of schools. The plan includes a phased approach to reopening, based on the level of COVID-19 transmission in each county.

The county has also been working with local school districts to develop their own plans for the safe reopening of schools. These plans include a combination of in-person and distance learning, as well as measures to prevent the spread of COVID-19.

LISTEN TO PEDIATRICIANS WHEN DECIDING HOW TO REOPEN.

BY PEDIATRICIANS

Dr. Rachel Kim, a pediatrician with the San Diego County Health and Human Services Agency, has been working closely with school district leaders to develop plans for the safe reopening of schools.

She has been emphasizing the importance of a phased approach to reopening, with a focus on ensuring that all schools are prepared to meet the needs of their students.

She has also been stressing the importance of a strong partnership between schools and community health care providers, to ensure that students have access to the care they need.

On Wednesday, the San Diego County Health and Human Services Agency announced a new partnership with all school districts in the county to provide a comprehensive approach to the safe reopening of schools.

The partnership includes a focus on mental health, with the goal of providing students with the support they need to succeed in the classroom.

The partnership also includes a focus on equity, with the goal of ensuring that all students have access to the resources they need to succeed.

The partnership is a critical component of the county's plan for the safe reopening of schools, and it will be essential to the success of the plan.
