

# Afghan Care Navigation

The Afghan Care Navigator will address health and social needs through care coordination using a whole child/family approach for Afghan children living in San Diego County.

## How We Can Help:

- ✓ Care coordination support such as scheduling appointments, arranging transportation, or filling prescriptions
- ✓ Make connections to community resources (i.e., food, housing, basic needs, immigration legal services, mental health, developmental services)
- ✓ Provide translation in Pashto and Dari Farsi
- ✓ Connection to community resources, culturally sensitive health education classes, school reintegration and accommodations
- ✓ Shared care planning with families to ensure health goals are met
- ✓ Linkage of children in the community to medical homes and sub-specialists
