Data are preliminary and may change due to delayed reporting and additional information obtained during investigations.

Most data in this report are presented by season, which is defined as CDC disease weeks 27-26. We start the data for 2026-27 on July 5, 2026.

The purpose of the **Respiratory Virus Surveillance Report** is to summarize current COVID-19, RSV, and influenza surveillance in San Diego County. Additional information on COVID-19, RSV, and influenza reporting, resources, data sources, and definitions can be found in the [Supplemental Information](#) document. A link to subscribe to this report is available via the Epidemiology Unit [website](#).

Visit the Respiratory Viruses Data and Reports [website](#) and the COVID-19 in San Diego County [website](#) to see additional data.

COVID-19, Influenza, and RSV Season-to-Date Overview

Table 1. Respiratory Surveillance Indicators

Indicator	2026-27 Season				2025-26 Season				Prior Years Average*		
	Week 35	Total To Date	Week 34		Week 35	Total To Date	Season Total		Week 35	Total To Date	Season Total
CASES											
COVID-19 [†]	718	3,373	689		974	5,459	12,593		3,077	35,110	173,180
Influenza	115	654	92		43	474	24,921		39	400	21,869
RSV	10	92	12		9	42	3,740		24	115	4,723
DEATHS [‡]											
COVID-19	0	10	4		6	31	90		18	98	600
Influenza	0	2	0		0	0	77		0	2	82
RSV	0	1	0		0	0	13		0	0	16
HOSPITALIZATIONS [§]											
COVID-19	104	506	109		169	881	2,319				
Influenza	12	75	13		4	44	2,733				
RSV	3	24	4		0	9	793				
OUTBREAKS											
COVID-19	1	28	3		3	52	114		8	89	391
Influenza	0	0	0		0	1	35		0	1	43
RSV	0	0	0		0	0	11		0	0	6
SYNDROMIC SURVEILLANCE [#]											
% ED COVID-19	1.6%		1.4%		2.1%				2.5%		
% ED Influenza	0.3%		0.2%		0.1%				0.1%		
% ED RSV	0.0%		0.0%		0.0%				0.0%		

2026-27 season is 7/5/2026 – 7/3/2027, Weeks 27-26. Previous weeks' case counts or percentages may change due to delayed processing or reporting.

*Includes seasons 2021-22, 2022-23, 2023-24, 2024-25, and 2025-26 for cases, deaths, and outbreaks and 2023-24, 2024-25, and 2025-26 for syndromic surveillance.

[†] Confirmed and probable COVID-19 cases.

[‡] Current season deaths are shown by week of report; prior season deaths are shown by week of death.

[§] The number of patients admitted to an inpatient bed who had laboratory-confirmed COVID-19, influenza, or RSV infection at the time of admission. Reporting was not mandated from 5/1/2024-10/31/2024. As a result, prior years average data are not available. Census data can be found on page 5 of this report and on our [Respiratory Virus Highlights dashboard](#).

^{||} See the [Supplemental Information](#) document for outbreak definitions. Includes only outbreaks occurring in skilled nursing facilities and other residential congregate settings.

[#] The weekly percentage of emergency department visits that result in a diagnosis of COVID-19, influenza, and RSV based on ICD-10 codes.

Respiratory Virus Surveillance Report

Emergency Department Data: Respiratory Diagnoses

Figure 4.1. Percent of Emergency Department Visit Diagnoses for Acute Respiratory Illness,* COVID-19, Influenza, and RSV by Week

Figure 4.2. Percent of Emergency Department Visit Diagnoses for Acute Respiratory Illness* by Age Group and Week

Diagnosis codes in syndromic surveillance data may include preliminary diagnoses that may not be indicative of confirmed disease. Interpretation of recent trends should be made with caution.
*Acute respiratory illness (ARI) includes diagnostic codes associated with specific respiratory infections (e.g., coronavirus, influenza, or RSV) and codes associated with general respiratory illness such as cough and pneumonia.

Respiratory Virus Surveillance Report

Proportion of Cases by Age Group and Episode Month, 2026-27 Season-to-Date

Respiratory Virus Surveillance Report

Vaccinations Administered

Figure 11.1. Percentage of San Diego County Residents Who Received a Seasonal*
COVID-19 Vaccine, Ages 6 Months and Older

*The lines show the percentage of persons with an annual COVID-19 vaccine per seasonal guidelines for that year. [COVID-19 Vaccines](#)

Figure 11.2 Percentage of San Diego County Residents Who Received a Seasonal
Influenza Vaccine*, by CDC Week and Season

*Week 52 data are repeated for week 53 for years that do not include week 53.

Respiratory Virus Surveillance Report

Vaccine Recipients by Age

Figure 12.1. Percentage of San Diego Resident Age Groups that Received a Seasonal 2025-26* COVID-19 Vaccination

*Using the CDPH seasonal 2025-26 guidelines. [COVID-19 Vaccines](#)

Figure 12.2. Percentage of San Diego Resident Age Groups that Received an Influenza Vaccination, 2026-27 Season-to-Date

Figure 12.3. San Diego Residents Immunized Against RSV since August 2023 by Eligible Age Group

*CDC recommends maternal vaccination during pregnancy or receipt of monoclonal antibodies for young babies to prevent RSV. Vaccines given to females of reproductive age are shown as data on pregnancy status of vaccine recipients is unavailable. There was an average of 37,301 live births during the last five years of available data.

**RSV vaccination is recommended for adults 50-74 years old at increased risk and all adults 75 years or older.

Respiratory Virus Surveillance Report

Wastewater Surveillance

2026-27 2025-26 2024-25 2023-24 2022-23

Figure 13.1. SARS-CoV-2 Detection in Wastewater by Season

Figure 13.2. Influenza A* Detection in Wastewater by Season

Figure 13.3. RSV Detection in Wastewater by Season

Data prior to 3/22/2026 provided by Wastewater SCAN: <https://wastewaterscan.org/>. Data starting 3/22/2026 provided by the County of San Diego Public Health Laboratory.
Moving average is calculated by taking the average of the 5 samples centered around a date after excluding the highest and lowest values.
*Detection of influenza in wastewater is specific to influenza A and captures H5 influenza along with seasonal H1 and H3. This assay alone cannot distinguish between the contributions of each subtype.

Respiratory Virus Surveillance Report

Influenza Subtypes

Figure 14.1. Influenza Subtypes by CDC Episode Week*

Figure 14.2. Influenza Subtypes, 2026-27 Season-to-Date

*Episode date is the earliest available of symptom onset date, specimen collection date, date of death, date reported. Data for the most recent week may be incomplete.
